Dear GitHub Hiring Team,

With the utmost eagerness, I want to express my interest & passion for the Data Scientist role at GitHub. As someone who is passionate about Artificial Intelligence with a strong technical hold on Python, I know my versatile skills and qualifications will make me an asset to the team.

As you will find on my resume, I have had a variety of experiences with many different roles in programming. I am looking to take the next step in my career by leveraging my Machine Learning skills to develop products within your company.

As a prospective intern, I immediately can bring the following qualities to the team:

Previous Programming Experience: In my previous experience as a data extraction and research Intern at ProfiVe. Also as a project intern at iotiot.in, I was able to create an industry-level computer vision project as a major contributor to our team. I am well versed in python basics as well as its machine learning, deep learning, web development, and web scraping application.

Team Lead and Member: I've had not only gained experience in the technical side of my work but also have attained the business acumen to know how to collaborate with teams as well as lead a team of 40+ people as a Python Team Lead during my time at Docplus. Throughout my experiences, I've been able to provide technical solutions and present recommendations to senior management leaders. My passion for coding and contributing align with your company's values and would be an asset for your company.

While my resume provides a quick summary of my experiences, I hope to have the opportunity to share how I can bring value to your company's needs.

Sincerely,

Ishani Kathuria
